## TrueFlow makes the difference

ndd's unique ultrasonic flow measurement is highly accurate in all flow ranges, independent of gas composition, pressure, temperature and humidity.

ndd **TrueFlow** is a resistance-free solution that does not require calibration during its lifetime.

## TrueCheck automated precision

Patented method to verify performance of ndd machines

- Eliminates the need for gas-calibration as well as the need for an external DLCO simulator

- 5-point calibration including stability and linearity of tracer gas and CO sensors
- Automatic flow baseline setting
